

Greiner Visor

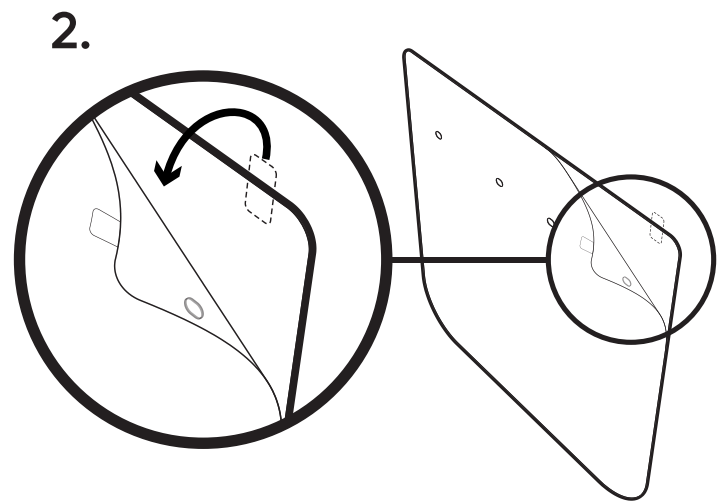

Assembly guide

Personal protection pursuant to EN 166

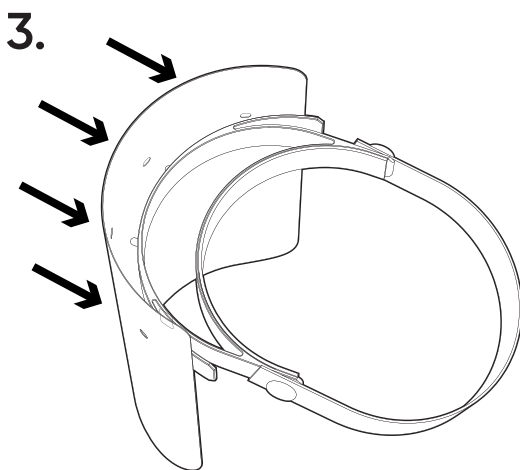

1. Unpack the headset and attach the elastic band to required size on the knob on the side of the frame (Fig. 1).

2. The visor is covered with scratch-protective film on both sides. Remove the film from the inner side using the pull off tab at the top (Fig. 2).

3. Place the visor on the headset (using the four perforations in the visor and the four pins on the headset). In order to ensure the functionality of the visor make sure that the side connections are locked in correctly (Fig. 3).

4. Just before using the visor for the first time remove the protective film from the outer side by again using the pull off tab at the top (Fig. 4).
